DATE DISTR. 25 Jan 54

NO. OF PAGES 1

NO. OF ENCLS.

SUPP. TO
REPORT NO.

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS REPORT IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1

1. Several types of tubes are being produced at the present time by the HF-Werk, in Berlin-Oberschöneweide. Large quantities of materials heretofore lacking have been received from the Soviet Union, especially cathode nickel and copper-nickel sheathed wire, also thorium powder and zirconium dioxide.
2. Production of the tube 6AC7 is now running about 600 pieces a day; of 6Q5 about 200 pieces; and of 6K7 and 6K8 about 400 pieces.
3. Materials for the RVI,2P2 tube are likewise available now. The semi-finishing works at Auerhammer and the Hettstedt light metal works are delivering them.
4. Production of type UCH 81, which had been pushed at the expense of the other types, has been greatly reduced. About 30,000 of this type are now being manufactured monthly.
5. Production of television tubes amounts to about 1,000 pieces a month. Production of type ECH 81 is about 24,000 pieces per month.
6. Type 6AC7 tubes are delivered mainly to the Funkwerk Dabendorf. UCH 81 is currently for the Soviet Union or for Soviet order.
